NAKSHATRA PRAJAPATI

AI Full-Stack Engineer

[nakshtraprajapati838@gmail.com] | [8604498996] | Lucknow, UttarPradesh, India | [LinkedIn URL] | [GitHub URL]

Summary

AI Full-Stack Engineer pursuing a B.Tech in Computer Science and Engineering (Artificial Intelligence & Machine Learning) at VIT Bhopal University. Experienced in building AI-powered applications and full-stack web platforms using Java, Python, React, Node.js, Express.js, and MongoDB. Passionate about Large Language Models, Prompt Engineering, Machine Learning, and scalable software systems, with a strong foundation in Data Structures & Algorithms and modern backend development.

Core Skills

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

AI / Machine Learning: Prompt Engineering, Large Language Models (LLMs), Groq API, Pydantic, OpenCV, Computer Vision, Machine Learning

Databases: MongoDB, Supabase

Tools & Platforms: Git, GitHub, VS Code, Postman, Render, Figma

Projects

Sigma GPT *React, Node.js, Express.js, MongoDB*

- Developed a full-stack AI chatbot inspired by ChatGPT using React, Node.js, Express.js, and MongoDB.
- Designed REST APIs to manage conversations and integrated the frontend with the backend for seamless real-time interaction.
- Implemented a clean, responsive user interface while resolving authentication, API integration, and deployment challenges.

AI Resume Screening System *Python, Groq API, Pydantic*

- Built an AI-powered resume screening application that evaluates resumes against job descriptions using Large Language Models.
- Implemented structured JSON validation with Pydantic to ensure reliable parsing and scoring of resume data.
- Automated candidate evaluation by generating match scores and actionable feedback to streamline resume analysis.

Deep Packet Inspection *Python, Machine Learning*

- Developed a Deep Packet Inspection system to analyze network traffic and extract meaningful packet-level information.
- Explored machine learning techniques for identifying traffic patterns and supporting intelligent network analysis.
- Designed the project with a focus on scalable packet processing and cybersecurity-oriented traffic inspection.

Wanderlust *Node.js, Express.js, MongoDB, Passport.js, Cloudinary*

- Developed a full-stack travel accommodation platform supporting property listings, authentication, and image management.
- Integrated Passport.js for secure user authentication and Cloudinary for efficient image storage and delivery.
- Designed RESTful APIs and implemented CRUD functionality to deliver a seamless property management experience.

Achievements

- Runner-up, Google Olympics
- Contributor/Mentee, GirlScript Summer of Code (GSSoC) 2026

Education

Bachelor of Technology (B.Tech), Computer Science & Engineering (AI & ML)

VIT Bhopal University | Expected Graduation: 2028 | CGPA: 8.4 / 10.0
